

**COUNCIL FOR EDUCATION POLICY RESEARCH AND IMPROVEMENT**

September 18, 2002

**SUBJECT: Other Items of Interest**

---

**PROPOSED COUNCIL ACTION**

For Information.

**BACKGROUND INFORMATION**

Since Council approval of the **2002 update of the Student Progression Study** at its May meeting, the staff has developed two additional work products to enhance readability and usability of the report:

1. An interactive web-based analysis tool that calculates bachelor's degree completion probabilities based on a variety of user-designed scenarios. The tool, which has generated over 170 hits since its release on August 23, can be accessed on the Council's web site at <http://www.cepri.state.fl.us>.
2. A four-page ***To the Point*** summary. This prototype for future Council studies was designed to defray printing costs and increase circulation of the report.

Also, enclosed are the *Goals and Action Agenda* of the Texas and Kentucky Higher Education Councils which may be of interest both in terms of content and format.
