The Postsecondary Education Planning Commission, initially created by executive order in 1980, given statutory authority in 1981 (SS 240.145 and 240.147, Florida Statutes), and reauthorized by the 1991 Legislature, serves as a citizen board to coordinate the efforts of postsecondary institutions and provide independent policy analyses and recommendations to the State Board of Education and the Legislature. The Commission is composed of 11 members of the general public and one full-time student registered at a postsecondary education institution in Florida. Members are appointed by the Governor with the approval of three members of the State Board of Education and subject to confirmation by the Senate.

A major responsibility of the Commission is preparing and updating every five years a master plan for postsecondary education. The enabling legislation provides that the Plan "shall include consideration of the promotion of quality, fundamental educational goals, programmatic access, needs for remedial education, regional and state economic development, international education programs, demographic patterns, student demand for programs, needs of particular subgroups of the population, implementation of innovative educational techniques and technology, and the requirements of the labor market. The capacity of existing programs, in both public and independent institutions, to respond to identified needs shall be evaluated and a plan shall be developed to respond efficiently to unmet needs."

Other responsibilities include recommending to the State Board of Education program contracts with independent institutions; advising the State Board regarding the need for and location of new programs, branch campuses and centers of public postsecondary education institutions; periodically reviewing the accountability processes and reports of the public and independent postsecondary sectors; reviewing public postsecondary education budget requests for compliance with the State Master Plan; and periodically conducting special studies, analyses, and evaluations related to specific postsecondary education issues and programs.

Further information about this publication as well as other Commission publications, meetings and activities of the Commission may be obtained from: the Postsecondary Education Planning Commission, 325 West Gaines Street, Ralph Turlington Building, Tallahassee, Florida, 32399-0400; Telephone (850) 488-7894; FAX (850) 922-5388; Website - www.firn.edu/pepc.

POSTSECONDARY EDUCATION PLANNING COMMISSION

***AN OVERVIEW OF INDEPENDENT HIGHER EDUCATION IN
FLORIDA: ENROLLMENTS AND STATE FUNDING***

INTRODUCTION

The *Master Plan for Florida Postsecondary Education* (1982) stated that independent education is crucial to the maintenance of diversity and choice in postsecondary education in Florida. Strong independent institutions are vital to an effective system of education after high school and to a balanced set of options for students and faculty. In its 1998 plan, *Challenges and Choices: The Master Plan for Florida Postsecondary Education*, the Commission calls for:

- increased utilization of independent schools, colleges, and universities to improve access to a degree; and
- continued investment of state support through programs such as the Florida Resident Access Grant (FRAG) to maximize the contribution of independent postsecondary education to Floridians.

Florida includes consideration of the resources of independent higher education in its *Master Plan* and appropriates public funds to promote its programmatic needs, to encourage student participation in the independent sector, and to support a dual-system of higher education. This report on enrollments in and state funding to independent institutions provides a review of certain aspects of the status of independent postsecondary education in Florida. The Commission believes that the review is useful to state policymakers responsible for distributing financial resources among all available postsecondary education resources and setting policy for the regulation of the independent sector.

Independent education is crucial to the maintenance of diversity and choice in postsecondary education in Florida.

This report reviews state funding and enrollments for the past several years with state appropriations from 1990-91 and 1991-92 adjusted to reflect funding holdbacks. Other Commission reports concerning the independent sector provide additional information concerning academic program contracting, the limited access competitive grant program, licensure of independent postsecondary education institutions, accountability for regionally accredited four-year independent colleges and universities in Florida, and state funding for historically black private colleges and universities. Included in this report are data concerning 23 regionally accredited four-year colleges and universities and all other institutions overseen by the State Board of Independent Colleges and Universities (referred to as private postsecondary institutions for financial aid purposes).

This report does not include information on a major segment of independent postsecondary education: the non-degree-granting proprietary sector. At the present time, no direct state funding is provided to institutions in the proprietary sector. Students at several of these institutions, however, may be eligible for some state student financial assistance. Information concerning this sector is maintained and annually reported by the State Board of Independent Postsecondary Vocational, Trade, Technical, and Business Schools (SBIPVTTBS). In 1996-97, 458 schools were licensed and reported enrollments of 70,603 students and completions of 37,502. Of the completers,

28,911 (77 percent) were placed in jobs, joined the military, or are continuing their education at an institution of higher learning. Of the 458 licensed schools, 144 (31 percent) are accredited by one or more of the national or regional accrediting agencies.

ENROLLMENTS

As depicted in Table 1, between Fall 1995 and Fall 1996, total higher education headcount enrollment increased slightly (2.3 percent). Enrollments for the state university system registered gains of 5.3 percent, and independent colleges and universities increased 7.1 percent. Enrollments decreased in community colleges by 1.0 percent. The independent sector's share of total headcount enrollments increased to 17.3 percent.

Total enrollments for institutions awarding baccalaureate degrees, including those in the independent sector and the State University System, increased during the eight-year period from Fall 1988 to Fall 1996 from 247,375 to 326,052 students (31.8 percent) (Table 2). In 1996, the independent institutions' share of enrollment in institutions awarding baccalaureate degrees was 34.2 percent, representing a slight increase from 33.8 percent in 1995.

In 1996, the independent institutions' share of enrollment in institutions awarding baccalaureate degrees was 34.2%.

The 1995 Legislature, as part of its "Higher Education Access 2000 Act," enacted a limited access competitive grant program to be administered by the Department of Education. The grant program is designed "to provide enrollment opportunities for qualified applicants in selected limited access baccalaureate programs or equivalent academic tracks in eligible independent institutions." Both community college graduates and state university students who are Florida residents and interested in enrolling in a high priority employment field identified by the State Board of Education will be eligible.

The Commission, in conjunction with the Florida Education and Training Placement Information Program, the Department of Labor and Employment Security's Bureau of Labor Market Information, the Board of Regents, and the Department of Education, identified programs that met criteria for limited access status and high priority employment fields and recommended the following eight programs to be eligible for the grant program for the 1997-98 year.

Special Education, General	Nursing
Education, Mentally Handicapped	Occupational Therapy
Education, Specific Learning Disabled	Physical Therapy
Education, Emotionally Handicapped	Radio/TV

(Note: Recommendations for 1998-99 include six programs: Special Education--General, Education--Mentally Handicapped, Education--Specific Learning Disabled, Nursing, Occupational Therapy, and Physical Therapy.)

In the Fall of 1997, there were 144 recipients (\$144,144) of the grant. While participation in the grant program increased since 1996-97 (22 participants,

\$40,895 dispersed), the number of recipients remains below the level that available funding would support. The low participation level can be attributed to a number of factors, including recruitment efforts and strategies and high demand programs in the independent sector being filled to capacity just as they are in the public programs.

Table 3 summarizes the appropriations made to independent colleges and universities by the Legislature for the past eight years with adjustments made for funding holdbacks in 1990-91 and 1991-92. In 1990-91, appropriations to independent higher education peaked at \$50.9 million and then decreased for two years to \$47.1 million in 1992-93. Appropriations increased for the following four years, reaching a new peak of \$73.3 million in 1996-97. Awards from appropriations for FY 1997-98 are estimated to exceed \$74.4 million. Appropriation for the Florida Resident Access Grant (FRAG, formerly named the Tuition Voucher) did not increase in 1997-98, and the Limited Access Grant was decreased from \$1,000,000 to \$500,000.

STATE FUNDING

Tables 4-6 detail appropriations for academic program contracts, state-supported education projects at independent institutions, and the FRAG and financial assistance funds granted to students attending independent institutions. With only a few exceptions, state funding for contract programs has decreased or remained flat since 1988-89. Four programs have not received their second year, phase-in increases (Florida Southern College - Elementary/Early Childhood Education and Accounting and University of Miami - Architectural Engineering and Film).

For the most part, state funding for the independent sector of higher education remained constant in 1997-98. Funding in 1997-98 for existing academic program contracts was held at the 1993-94 level with one exception: the master's degree program in Social Work at Barry University--Ft. Myers was not funded. No new contracts have been funded since the mid-90s (see Table 7 for history of academic contract proposals). Funding for the University of Miami's Medical Training Simulation Lab increased \$500,000 to \$2.0 million. An additional \$1.0 million was appropriated to the University of Miami's First Accredited Medical School (\$14,645,200).

SUMMARY

Appropriations for need-based aid decreased in 1997-98 (\$8,189,290--down from \$8,318,187 appropriated the prior year). Reductions in state-funded, need-based aid are typically offset by institutional aid, driving tuition charges higher and widening the tuition gap between public and private higher education. The long-range result of such reductions impacts tuition rates, need-blind admission policies, diversity of the student body, number of working students, time to degree completion, enrollment levels and attrition in the independent sector, student demand for space in the public sector, and the financial viability of independent institutions.

Funding practices which favor non-need-based or non-student programs rather than need-based programs, may diminish student access to programs in the independent sector in Florida.

All state funding mechanisms for the independent sector experienced funding reductions at some point during the early 1990s. These funding reductions generally appear to reflect reduced state revenues and economic constraints rather than a redefinition of the State's goal to achieve and preserve a strong dual-system of higher education in Florida. Funding practices during the initial years of economic recovery which favor non-need-based or non-student programs rather than need-based programs, however, may diminish student access to programs in the independent sector in Florida.

The Commission's 1994 study, *How Floridians Pay for College*, determined that: a) access to postsecondary learning is at jeopardy for low income Floridians, b) the State's commitment to need-based aid does not reflect the statutory priority placed on this form of assistance, and c) total dollars borrowed through guaranteed student loans in Florida more than doubled between 1990 and 1993. The report called for a renewed emphasis on funding need-based aid, expansion of access strategies such as Florida Resident Access Grants and academic program contracting, and an assessment of the loan indebtedness of students in all postsecondary sectors. Attention to these policy issues should strengthen the alignment of state funding practices with the State's priorities concerning enrollments, completions, and viability of both the independent and public sectors of higher education in Florida.

* Appropriations adjusted to reflect holdbacks.

** Amounts based on actual awards rather than appropriations, except for most recent year. Florida Resident Access Grant (FRAG) was formerly the Tuition Voucher.

*** In 1990-91, actual awards amounted to \$7,351,930 for independent colleges and universities and \$1,047,740 for private postsecondary institutions.

In 1991-92, actual awards amounted to \$7,419,309 for independent colleges and universities and \$1,413,389 for private postsecondary institutions.

In 1992-93, actual awards amounted to \$6,114,666 for independent colleges and universities and \$1,117,637 for private postsecondary institutions.

In 1993-94, actual awards amounted to \$6,635,837 for independent colleges and universities and \$1,309,204 for private postsecondary institutions.

In 1994-95, actual awards amounted to \$7,252,405 for independent colleges and universities and \$1,379,614 for private postsecondary institutions.

In 1995-96, actual awards amounted to \$6,857,357 for independent colleges and universities and \$1,183,026 for private postsecondary institutions.

In 1996-97, actual awards amounted to \$7,228,867 for independent colleges and universities and \$1,205,382 for private postsecondary institutions.

In 1997-98, the appropriations for FSAG specified \$6,567,477 for independent colleges and universities and \$1,621,813 for private postsecondary institutions.

**** Proviso requires that as of 1992, the Commission provide the same review as for academic program contracts.
